

DVD Rental Data Warehouse

IS 6480

Group 9 - Summer 2024

Vinita Jain, Sreya Biswas, Evan Cady, Lakshmi Alekhya Tatampudi

21 July 2024

Background

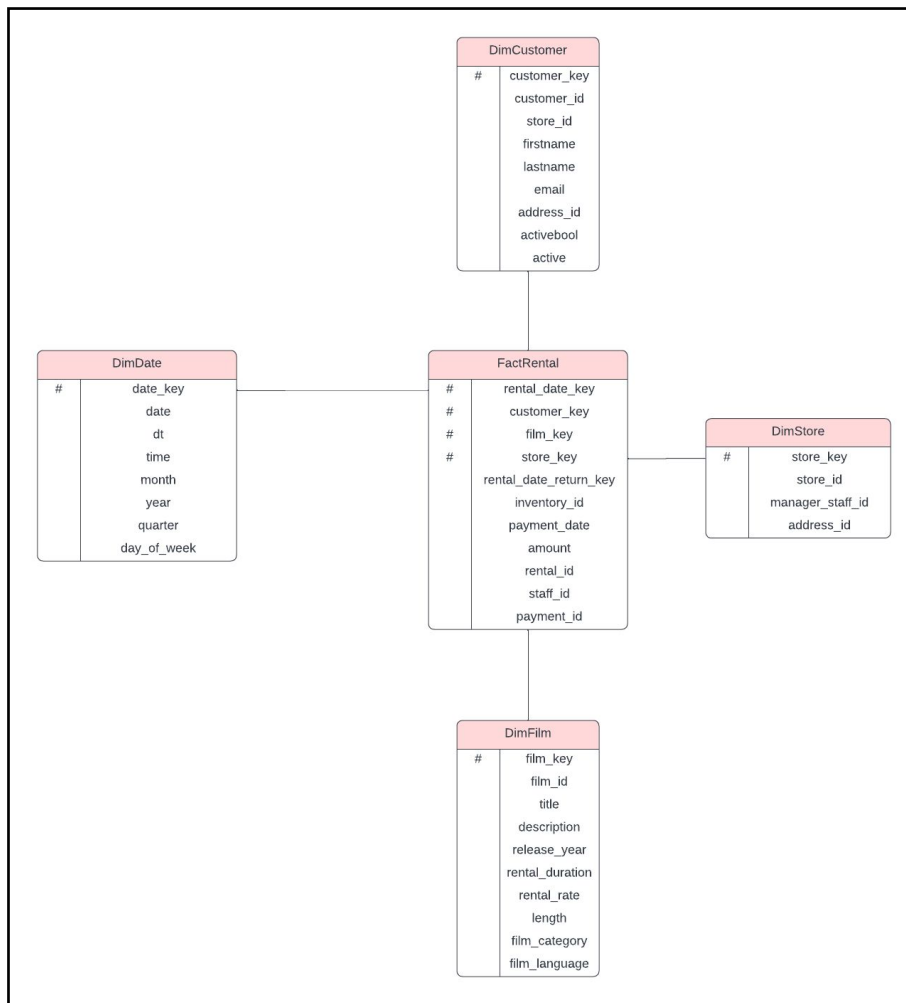

The company would like to gain insight into trends relating to rentals and the profile of its customers and their spending. We also want to see which employee is the most effective at the company so that a promotion program could be implemented. Each rental has a return timeframe, which if not met can affect profitability. We want to see how late rentals affect profits. In doing so, we want to understand where providing incentives such as a rewards program might improve sales, which employees should be considered for promotion, and what the impact of late DVD returns are on our business.

Requirements and Goals

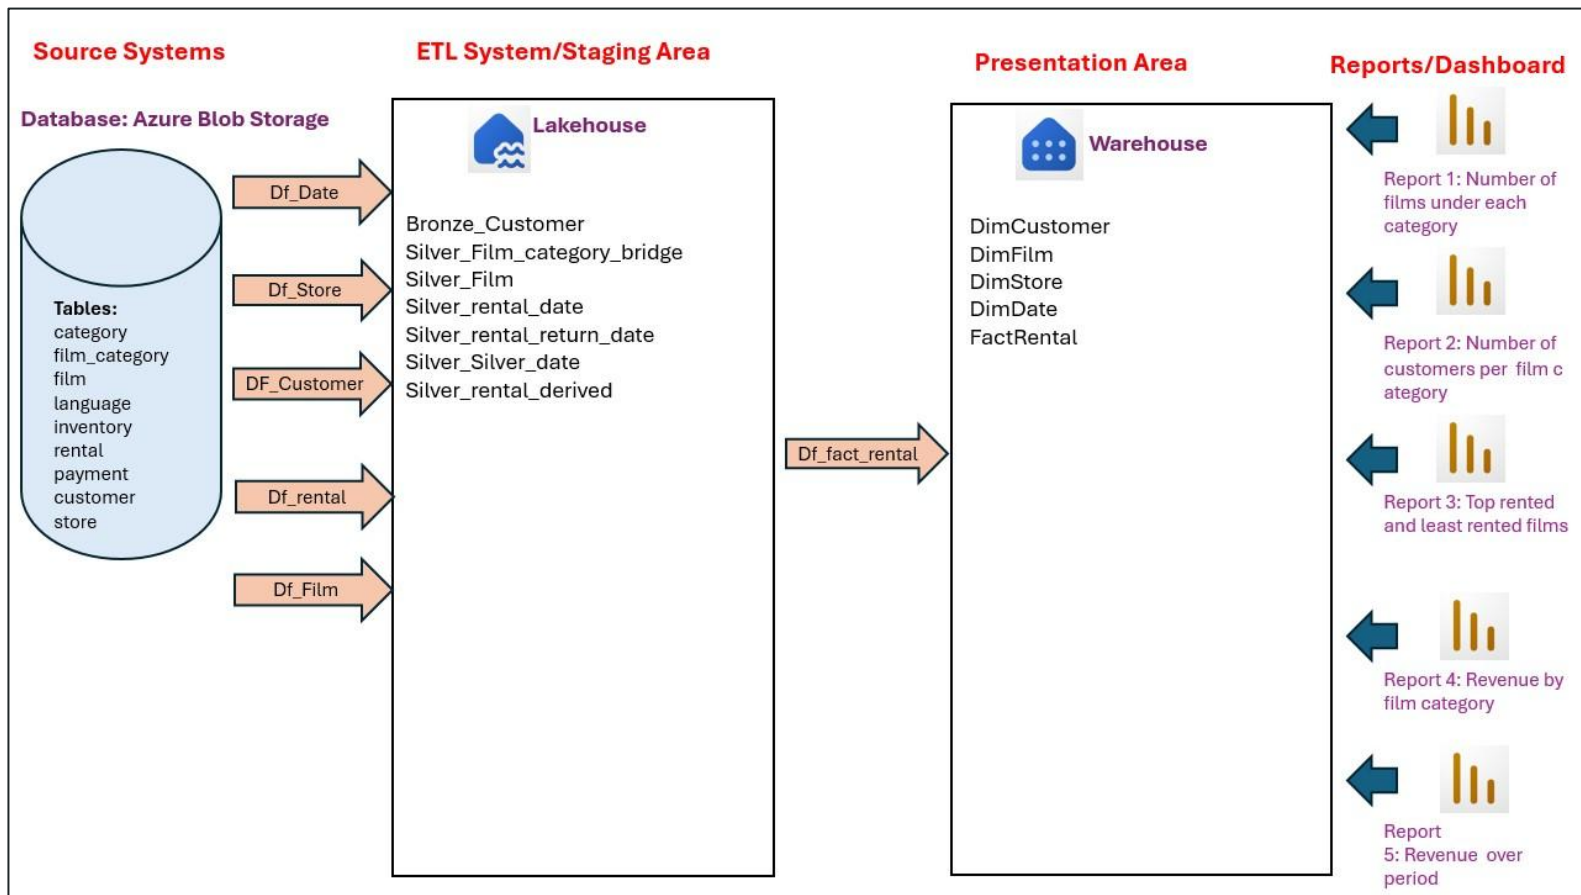

Questions we want to answer:

- Which film category has highest number of Films?
- Which films have been most rented and least rented?
- What film category are the customers more interested and least interested in?
- What is the average age of customer interests according to film genre?
- Analyze customer spending over time?
- What is the average number of rentals at each store per year?
- Which staff member processed the highest total payment amount in each store in each year?
- What is the trend of the income that we have made over the time period?
- Which film category has made highest Income and lowest Income?
- What are the sales peak hours and days at particular store?
- Analyze late returns. This insight can be used to calculate revenue impact.

Future Additions

Customer Segmentation Analysis:

- i. Segment customers based on rental behavior, spending patterns, and preferences.
- ii. Identify high-value customers and target them with personalized offers.

Rental Trends and Patterns:

- iii. Analyze daily, weekly, and monthly rental patterns.
- iv. Identify peak rental times and seasons.

Dimensional Model Updates:

1. **DimCustomer:**
 - Add columns for **age**, **gender**, and **location**.
2. **DimFilm:**
 - Add columns for **rating**, **director**, and **actors**.
3. **DimStore:**
 - Add detailed address attributes such as **city**, **state**, **country**, and **size**.
4. **FactRental:**
 - Include detailed payment information with attributes like **payment_method** and **payment_status**.
